

Backend Developer | C# | ASP.NET Core | .NET

Michał Mucik

Backend Developer focused on ASP.NET Core and .NET. Building warehouse management software based on real logistics experience using Layered Architecture, CQRS and Domain-Driven Design.

Projects

MyWarehouse

Warehouse Management System REST API

REST API for warehouse management built with Layered Architecture, Domain-Driven Design and CQRS.

C# · .NET · ASP.NET Core · EF Core · SQL Server
Layered Architecture · DDD · CQRS · MediatR
xUnit · GitHub Actions · Azure · Swagger

- Designed a domain model for receiving, inventory, picking and shipping workflows.
- Implemented CQRS with MediatR to separate command and query responsibilities.
- Created over 300 integration tests covering business scenarios.
- Automated build and test verification with GitHub Actions.
- Published the application to Microsoft Azure App Service.

Tech skills

Languages

- C#
- SQL

Frameworks

- .NET
- ASP.NET Core
- EF Core

Architecture

- Layered Architecture
- DDD
- CQRS
- MediatR

Testing & Tools

- xUnit
- GitHub Actions

- Git
- Azure
- Swagger

- Created over 300 integration tests and configured GitHub Actions for automated build and test verification.

Warehouse & Logistics Operations

2004 - Present | Poland, the Netherlands, USA

- Over 20 years of experience in warehouse logistics, inventory management and distribution.
- Managed pallet purchasing operations and worked across multiple logistics environments.
- Daily user of Warehouse Management Systems (WMS), applying operational knowledge directly to backend system design.
- Practical experience with receiving, storage, picking, packing and shipping processes.

Surveying

2007 - 2011

- Field surveying and engineering measurements.
