Tech skills

Core Technologies

C# 12
.NET 8
ASP.NET Core
Entity Framework Core
MS SQL

Architectural Patterns

- ✓ Clean Architecture (Domain, Application, Infrastructure)
- ✓ Domain-Driven Design (Aggregates, Value Objects, Events)
- ✓ CQRS (Command Query Responsibility Segregation)
- ✓ Repository + Unit of Work
- ✓ Dependency Injection

Testing & Quality

xUnit
Integration Testing
Test Containers
Moq

Tools & DevOps

Git & GitHub
CI/CD (GitHub Actions)
Swagger/OpenAPI

Backend Developer | C# .NET

Michał Mucik

Transforming business problems into clean code solutions. 2 years of intensive learning: Clean Architecture, DDD, CQRS. Background: Engineering + Logistics = Business-aware developer.

Projects

Warehouse Management System API

Production-ready REST API built with Clean Architecture and DDD

C# 12 .NET 8 Clean Architecture DDD CQRS EF Core MS Sql xUnit

- Domain-driven design with aggregates and value objects
- CQRS pattern using MediatR
- Integration tests with TestContainers
- RESTful API with Swagger documentation
